**Subject:** File# ZNG/6926 Z-041/22

With regards to the future dwelling to be constructed at 966 California Ave.

I ask: HOW can a pre-existing single dwelling piece of land be converted over to a 5 dwelling unit without subsequent parking problems?

Currently there is only one entrance to the land off of California, thus making additional entryway on to David St. would take away VALUABLE parking spaces.  
When buildings are built, do they not have to also provide on-site parking? Behind them is only an OPEN alley way.

There is no land on the site that can accommodate cars, vans or trucks, and there is very little parking spaces available on either California and/or Davis Street due to the vicinity to the University of Windsor.

I am AGAINST the proposal due to the increase in traffic at an already busy intersection, and the parking implications.
