

Investing in Canada Infrastructure Program (ICIP) Public Transit Stream Projects

The Investing in Canada Infrastructure Program (ICIP) is a federal infrastructure program designed to create long-term economic growth, build inclusive, sustainable and resilient communities and support a low-carbon economy. The Public Transit stream of ICIP will primarily build new urban transit networks and service extensions that will transform the way that Canadians live, move and work. This stream will fund construction, expansion and improvement of public transit networks. The following is a list of approved City of Windsor projects.
