ITEM NO. 8.5

Memo

Date: November 18, 2015

To: Mayor and Members of Council

Subject: **ADDITIONAL INFORMATION TO COUNCIL:**
Report #S35/2015 - Road Rehab of Woodlawn and Parkwood Avenues

In the preparation of Report # S35/2015 in response to CQ38-2015 which:

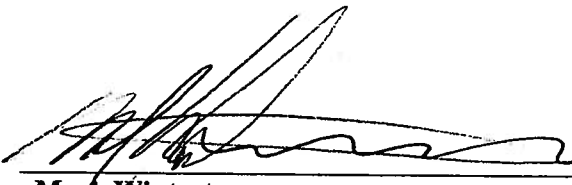

"Asks for a report on the feasibility of the Woodlawn and Parkwood pavements being rehabilitated in 2016"

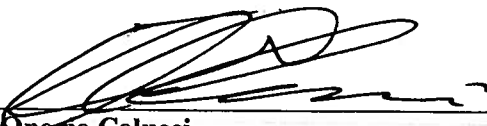

The Road Rating List was used to confirm the SCI rating of the roads in question. On the Road Rating List, printed in June of 2015, the SCI ratings for Woodlawn and Parkwood were 57 and 24 respectively, based on inspections completed in March, 2010 for Woodlawn and July 2011 for Parkwood. Subsequent to the Road Rating List information, an inspection was carried out on Parkwood in July of 2015 which changed the SCI rating to a value of 57.

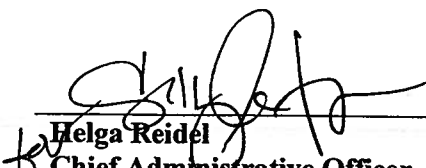

ased on the new SCI rating for Parkwood, the revised rating of 57 should be used for this road when determining potential rehabilitation methods. The rating of 54 remains unchanged for Woodlawn since there has been no new inspections of the road since 2010.

Recommendations in the report would remain unchanged since due to the SCI rating being over 20, the road would not be recommended for a mill and pave, only for reconstruction.
