

IMPORTANT NOTICE

September 2019

Dear Homeowner/Occupant:

**RE: CITY OF WINDSOR CONTRACT #68-19
ROAD AND WATERMAIN RECONSTRUCTION – LOUIS CATARAQUI TO ERIE**

As part of an ongoing infrastructure renewal program, the Windsor Utilities Commission (WUC) will be installing a new 300mm dia. PVC watermain on Louis Avenue – Cataraqui to Erie.

Sterling Ridge Infrastructure Inc., under contract with the City of Windsor, is scheduled to begin work the week of September 9, 2019. The project should take approximately 12 weeks to complete. Project timing is weather dependent. Tree trimming will also occur in advance by a certified sub-contractor.

It should be stressed that construction sites are inherently dangerous and pose many potential safety hazards. Extreme caution should be exercised by all, especially children.

We appreciate your cooperation. Every attempt will be made to minimize interference with local activities and trust that the new watermains will provide a trouble-free water service and increased fire protection for many years.

Frequently asked questions:

1. Will my lawn, driveway or sidewalk be dug up?

Answer: Yes, there will be small excavation, 3m (10') x 2.5m (8') near your water service shut off, to connect your existing water service to the new watermain.

2. Will my water supply be interrupted?

Answer: Yes, there will be a short planned interruption of less than 4 hours when your water service is connected to the new watermain. The onsite ENWIN watermain inspector will attempt to notify you in person prior to this shutdown. Unplanned interruptions may occur if the old watermain breaks during construction.

3. Will the road be closed, experience traffic disruptions or be excavated?

Answer: Yes the road will be closed / have lane restrictions during construction. The East side of the road will be excavated for the watermain installation.

4. I have a sprinkler system in my front lawn, what should I do?

Answer: Please make an effort to mark out the sprinkler lines and heads with white spray paint. If this is not possible, please notify ENWIN Utilities. Any damage to sprinkler lines that occurs as a direct result of construction will be repaired by the contractor at no cost to the homeowner.

5. Will Municipal Waste Collection be disrupted?

Answer: No, garbage / recycling / yard waste will be collected on the scheduled days **in the usual locations**. If your garbage is typically collected at the curb, please ensure that garbage is placed in a plastic bag (no pails), for alley garbage collection please continue to abide by City bylaws and ensure you garbage is placed in pails, blue and red recycle boxes are to be clearly labelled with your address and yard waste is in paper yard waste bags. For further information on garbage collection please contact the City 311 service.

6. Will I have access to my driveway throughout construction?

Answer: Yes, however, there may be some short delays of a few hours for watermain installation across the driveway and again for water service connection work only if the water shut-off is in the driveway. Also access to your driveway may be temporarily unavailable for periods during road paving.

7. Will the street be completely reconstructed?

Answer: The 900 block of Louis, the road will be reconstructed and the 800 Block of Louis will be milled and paved by the Public Works Department after the watermain work is complete.

8. I have shrubs and landscaping in my front yard. Will they be damaged?

Answer: WUC will make every effort to avoid or minimize damage to landscaped areas on private property; however, we are required to follow City of Windsor Engineering Best Practice BP 3.2.2 and cannot authorize the Contractor to restore these areas in the public right of way. All property owners are urged to remove these items in advance. The on-site ENWIN watermain inspector can meet with you to help clarify what areas will be excavated.

9. Construction started several days ago and my water was brown this morning, why did this happen and what should I do?

Answer: Periodically, the watermain work causes disturbances in the old watermain. Run a cold water tap closest to your water meter until the water runs clear.

10. Construction progressed for several days and now there is no activity, what is happening?

Answer: The new watermain has been installed and is now being disinfected, sampled and tested by ENWIN staff. This process can take from 5 to 10 days to complete. New water services will then be installed from the new watermain to the property line, where they will be connected to the existing water service. When all water services have been transferred, the old watermain will be capped and abandoned.

11. Will my lawn, driveway or sidewalk be restored?

Answer: Yes, affected lawn areas will be restored with topsoil and sod. The Contractor will be required to water and maintain the lawn for 30 days after it is placed. Once the 30 day period expires, lawn maintenance, including watering, weeding and mowing is the sole responsibility of the homeowner. Driveways and sidewalks will be restored to City of Windsor specification. ENWIN watermain inspectors take hundreds of photos before / during and after construction to ensure proper restoration.

12. A new fire hydrant has been placed in front of my house, can it be moved?

Answer: No, ENWIN is required to follow NFPA standards for fire hydrant spacing. Fire hydrants are always placed in the public portion of the right of way and are spaced to maximize fire protection and neighbourhood parking while meeting the established design standards. The location is non-negotiable.

THANK YOU FOR YOUR CO-OPERATION!
