

Bicycle Road Safety Audit

Invitation to Community Café

Where: 400 City Hall Square East, Meeting Room 409

When: Wednesday, June 21 from 7:00 to 8:30 pm

The City of Windsor is undertaking Bicycle Road Safety Audits at the following four locations:

- Lauzon Parkway and Tecumseh Road East;
- Windsor Avenue and Tecumseh Road East;
- Drouillard Road and Wyandotte Street East; and
- Walker Road and Ypres Avenue.

Cycling is an integral part of the City of Windsor's transportation plans and the safety of cyclists, motorists and pedestrians is a priority. The purpose of the audits is to obtain a better understanding of the conditions and issues that influence safety at these four locations and to consider improvement options to address concerns where appropriate.

The process will be completed in three basic stages:

1. Information Gathering – The Community Café is a workshop designed to allow the City and their consultants, BT Engineering, to benefit from the local knowledge and experiences of the area's cycling community and to obtain a better understanding of location specific issues and concerns.
2. Field Reviews – to observe site characteristics for all roadway users during various time periods and further identify site specific issues and concerns. (There is an opportunity for a limited number of individuals to participate in field reviews that will be conducted on June 22 either during the morning or afternoon peak periods.)
3. Analysis, Reporting and Documentation of Findings – Identifying issues and concerns and recommending countermeasures to address those concerns where appropriate.

If you wish to attend the Community Café or if you are interested in participating in the field review of any of these sites, please contact:
