

WHAT IS TRAFFIC CALMING?

Traffic calming on City roads is governed by the City of Windsor Traffic Calming Policy.

The objectives of this policy are to:

- Alter driver behaviour
- Improve conditions for non-motorised road users
- Reduce negative effects of motor vehicle use

Traffic calming projects are the implementation of mostly physical measures to:

- Reduce vehicle speeds
- Reduce cut-through traffic volumes
- Improve pedestrian comfort

The purpose of this meeting is to present our findings to the public, identify possible solutions and obtain feedback for review.
