**RE: TRAFFIC CALMING REVIEW STAGE 1 SURVEY  
EASTCOURT DRIVE (FOREST GLADE DRIVE TO STILLMEADOW ROAD)**

Dear Resident,

We are requesting your input on a potential traffic calming project in your area.

A request for traffic calming has been received for **Eastcourt Drive from Forest Glade Drive to Stillmeadow Road**. To determine whether traffic calming would be supported by neighbourhood residents, a survey is being carried out. We request that you call 311 to indicate whether or not you would support traffic calming on Eastcourt Drive. Please call within 30 days of the date of this letter to ensure that your vote is counted.

In order to place your vote, please call 311 and state that you are responding to the **traffic calming survey for Eastcourt Drive**. You will be asked for your name, address, your vote on the traffic calming survey, and given an opportunity for any other comments. After the 30-day survey period, results will be posted to the City's website under Current Traffic Calming Projects.

For this request to move forward in the traffic calming review process, support from 60% of the properties in the petition area is required. A successful petition does not guarantee that traffic calming will be installed, however it does ensure that a neighbourhood traffic calming review will be carried out.

This survey letter is being sent to every household within the petition area. Please refer to the attachment for reference. Properties including multiple dwellings are allocated a single vote for the survey. A successful vote can be achieved either by:

- Approval from the Manager or Owner  
OR
- 60% support from the individual units

For more information on traffic calming, please search for "traffic calming" on the City website ([www.citywindsor.ca](http://www.citywindsor.ca)). If you have any questions and/or concerns, please do not hesitate to contact Awele Nwaesei, Transportation Planning Coordinator, at 519-255-6267, ext. 6831 at your convenience.

Yours truly,

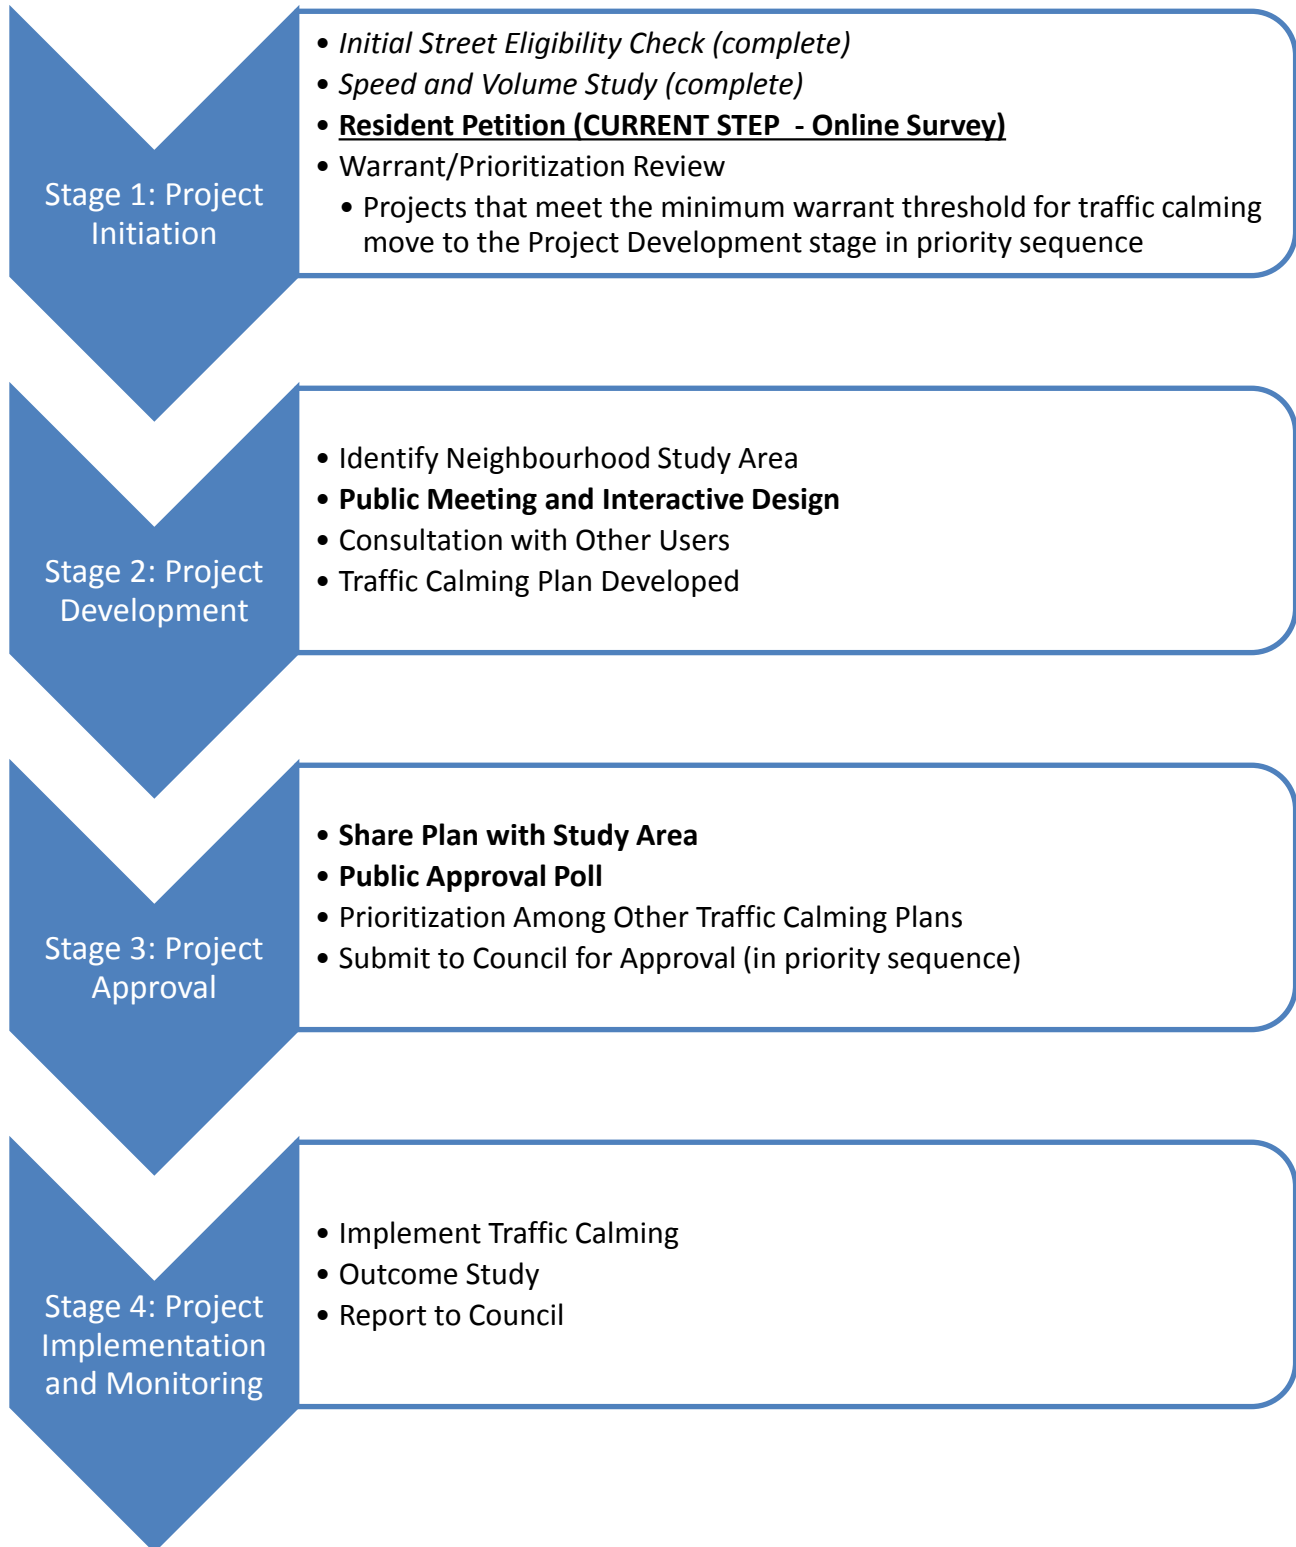

Jeff Hagan, P. Eng, PTOE  
Transportation Planning Senior Engineer
