

## Prince Road Storm Sewer Outlet Schedule 'C' Municipal Class Environmental Assessment Notice of Study Completion

In February 2021, the City of Windsor initiated a Schedule C Municipal Class Environmental Assessment (EA) study for the proposed Prince Road storm sewer outlet at McKee Creek. This study built on work completed under the Sewer & Coastal Flood Protection Master Plan (SCFPMP) and focused on finding the preferred location and design of the outlet and associated pumping station. The study area is shown on the key map.

A recommended location has been selected on 3800 Russell Street and an adjacent portion of Essex Terminal Railway Co. lands, within the study area. In addition, the recommended design of the outlet and pumping station has been developed.

The study was completed in accordance with the requirements of Schedule 'C' projects as outlined in the Municipal Class EA document (2000, as amended in 2007, 2011 and 2015), which is approved under the Ontario Environmental Assessment Act.

### ENVIRONMENTAL STUDY REPORT

An Environmental Study Report (ESR) has been prepared as part of this study. The ESR summarizes the study process and recommendations, and is available for public review for 30 calendar days from January 7, 2023 to February 8, 2023. The City of Windsor is committed to informing and engaging the public about this study and will be providing the ESR for review online, on the City of Windsor's website, at <https://www.citywindsor.ca/residents/Construction/Environmental-Assessments-Master-Plans/Pages/Prince-Road-Storm-Sewer-Outlet-Environmental-Assessment.aspx>. If you require any accommodation to access the project information or online material, please contact the City of Windsor Project Manager listed below.

Interested persons may provide written comments to the project team by February 8, 2023. All comments and concerns should be emailed directly to the City Project Manager, Ian Wilson ([iwilson@citywindsor.ca](mailto:iwilson@citywindsor.ca)) or discussed via telephone (519-255-6100 ext. 6369).

In addition, a request may be made to the Ministry of the Environment, Conservation and Parks for an order requiring a higher level of study (i.e., requiring an individual/comprehensive EA approval before being able to proceed), or that conditions be imposed (e.g., require further

## Prince Road Storm Sewer Outlet Schedule 'C' Municipal Class Environmental Assessment Notice of Study Completion

studies), only on the grounds that the requested order may prevent, mitigate, or remedy adverse impacts on constitutionally protected Aboriginal and treaty rights. Requests on other grounds will not be considered. Requests should include the requester contact information and full name for the ministry.

Requests should specify what kind of order is being requested (request for additional conditions or a request for an individual/comprehensive environmental assessment), how an order may prevent, mitigate, or remedy those potential adverse impacts, and any information in support of the statements in the request. This will ensure that the ministry is able to efficiently begin reviewing the request. The request should be sent in writing or by email to the City of Windsor and to:

Minister of the Environment, Conservation and Parks  
Ministry of Environment, Conservation and Parks
