

Honey Locust

Gleditsia triacanthos var. inermis

Hardiness Zone	5
Mature Height	40-70 feet
Mature Form	Rounded to broad spreading, rather open
Features	Compound leaves with small leaflets, leading to a dappled shade under the tree; autumn color usually yellow
Insect or Diseases	Canker, leaf spot, powdery mildew, root rot, honeylocust borer, webworm, spider mites, plant bugs
Culture	Full sun; moist, well drained soil; tolerates drought, high pH, and salt
Notes	Many insect and disease problems have become serious due to the overuse of this species; cultivars that produce seed pods can be messy

Size

Exposure

Tolerance

Wind	No
Wet Sites	No
Dry Sites	Yes
Alkaline Soil	Yes
Salt	Yes
Air Pollution	No
Soil Compaction	No

Uses

Windbreak	No
Street	Yes
Specimen	No
Shade	Yes
Massing	No
Screen	No
Patio	No
