

Pin Oak

Quercus palustris

Hardiness Zone 5
 Mature Height 60-75 feet
 Mature Form Pyramidal to oval
 Features Russet to red fall color; form
 Insect or Diseases Anthracnose, oak wilt is a potential problem (other problems are possible, but usually not serious)
 Culture Full sun; very tolerant of wet sites; requires acid soil
 Notes Iron chlorosis (yellowing of the leaves) is very common on this species when planted in alkaline soils; easy to transplant due to a fibrous root system

Size
